

QUOTES FROM INDUSTRY EXPERTS AND CEDIA AWARD WINNING DESIGNERS

From the moment the music started it was clear I was listening to something very special. There are very few times in your life you hear a system that gives you such a palpable sense of reality that closing your eyes simply completes the immersion experience. This is a system of speakers playing at another level to the competition”“The sound was immersive and realistic when listening to the concert demo”

“The demo clips were ones that we used regularly and I almost jumped out of my seat during the ‘Unbroken’ clip. The Elementi system and Storm controller delivered an astonishing cinema experience”

“It’s the audio that truly blows you away — so much power, so clean. My wife almost cried, hearing this for the first time.”

**Australia’s new benchmark in Home Cinema
Speaker and Amplifier design.**

“one of the best systems I have ever heard”

Having spent some time with the Elementi Audio range doing some critical listening with my favourite movie soundtracks, I can comfortably say that the Elementi Audio system offers a huge cinematic sound stage and prestigious sound quality superior to that of any other active cinema speaker system that I have installed or heard to date.”

“Power and finesse is hard to find, but add to that incredibly deep, powerful and quick bass like I haven’t heard before.... sign me up. If there is a better system in the country, I am yet to hear it

“I’ve heard that demo so many times on so many systems, but I’ve never heard it like that before”

“Deeply impactful Bass and very comfortable at high levels”
